CENSON® Care

About CENSON® Care

- CENSON® is a developer and provider of Healthcare Information Technology products and services. We offer a broad range of solutions covering Hospital Management, Clinic Management, and Patient Management. With support available in Europe, North America, Asia, Australia, and the Caribbean, in local languages, and 24/7/365.
- Our solutions are available through a subscription model, and meet regulatory requirements including HIPAA and the EU Data Protection Directive.
- We are offering three Patient Management solutions through the RestcommONE Marketplace. They are:
 - Remote Patient Monitoring
 - Remote Patient Care
 - Telemedicine Collaboration Solution
- Find out more at censoncare.com

Remote Patient Monitoring

CENSON® Remote Patient Monitoring is a universal e-health solution platform that solves the chronic care problem by offering the flexibility to adapt to national as well as local clinical guidelines – and by using disease-specific clinical workflows. The e-health solution is easily adaptable to any condition or chronic disease including COPD, CHF, Asthma, Diabetes, and Dementia.

CENSON® supports off-the-shelf medical devices and tablets – and takes advantage of cloud technology to enable scaling. The solution monitors patient health by comparing health targets, such as blood pressure, to actual readings taken through devices, or manual input.

Target Market

- Home health care agencies, Skilled nursing facilities, Medical clinics, Senior care facilities, Rehabilitation hospitals, and similar. Our Remote Patient Monitoring solution allows these agencies to reduce cost of care delivery, and increase revenues through Medicare/Medicaid.

Target Customer

- Patients who require ongoing monitoring of a chronic health condition, either due to illness, medical condition (such as pregnancy) or age.

Pricing

- \$ 39 per patient per month (There is no cost for care givers, physicians, etc. who access the system)
- Includes 400 voice minutes, 300 webrtc minutes, and 120 sms messages per month. Excess use is charged at standard rates.

Support

- Toll free phone support available 24/7/365 in local language. Calls may be elevated to helpdesk ticket with support response target of 8 hours for technical issues.

Remote Patient Care/1

CENSON® Remote Patient Care is a universal e-health solution platform that solves the chronic care problem by offering the flexibility to adapt to national as well as local clinical guidelines – and by using disease-specific clinical workflows. The e-health solution is easily adaptable to any condition or chronic disease including COPD, CHF, Asthma, Diabetes, and Dementia.

CENSON® supports off-the-shelf medical devices and tablets – and takes advantage of cloud technology to enable scaling. The solution monitors patient health by comparing health targets, such as blood pressure, to actual readings taken through devices, or manual input.

The CENSON® Remote Patient Care solution includes:

- 911 Support and Follow-up - CENSON® can call 911 on your behalf.
- Multilingual Support - CENSON® can provide support in local languages.
- Friendly automated calls each day - Get peace of mind and security for you and your family.
- Friends or family notification - Should you indicate that you are in need of assistance, we will automatically notify the people you designate as personal contacts.
- Medication reminder service, you can easily follow your medication schedule as prescribed by your physician.
- Daily message that includes helpful information on exercising, eating right and living a heart-healthy lifestyle.

Target Market

- End users who suffer from chronic diseases such as asthma, diabetes, copd, chf, dementia, and similar. We see these as a great product for MVNO's who wish to provide access to healthcare services, that are fully managed.

Target Customer

- Patients who require ongoing monitoring of a chronic health condition, either due to illness, medical condition (such as pregnancy) or age.

 - Inhaler (Optional Pulmonary Kit)
 - Support
 - Toll free phone support available 24/7/265 in local language. Calls may be elevated to helpdesk ticket with support response target of 8 hours for technical issues.

Telemedicine Collaboration Solution

- Doctors and hospitals have often found that they required multiple e-healthcare solutions to monitor patients who have a range of different diagnoses. This has been one of the obstacles making it difficult to harvest telemedicine solutions economic benefits. There is many different telemedicine providers on the market - but we offer a unique and a universal e-health solution to meet your need.
- The system consists of the following major parts:
- A HIPAA compliant web application for the clinician, so that health care professionals can receive measurements, view and analyze patient health data, initiate video consultations with the patient, and prepare clinical workflows.
- A tablet app for the patient, which uses a unique clinical workflow to guide the patient through capturing measurements.
- A large variety of connected measurement devices. A central data repository with IHE-XDS, HL7-CDA, and REST interfaces.
- CENSON® supports secure data exchanges between relevant entities, and can provide operational management necessary to implement and use the solution.

Target Market

- Hospital systems, Healthcare insurers, HMO's, Specialist medical clinics, Government health departments, community health/nursing, and similar.

Target Customer

- Patients who require ongoing monitoring of a chronic health condition, either due to illness, medical condition (such as pregnancy) or age.

Pricing

- % \$ 18 per patient per month (There is no cost for care givers, physicians, etc. who access the system) No minutes are included in base package.
